Note that for 2024 the African-American (Black) graduation rate **dramatically increases**. Yet, there are **no numbers given for the number of students**.
Not sure what RV mean. Perhaps it means restricted value as in the number of students is statistically low; RV is sometimes used to protect privacy.
If RV means a statistically low value the question is why did the number of Black students in 12 grade drop so dramatically from previous years.
Perhaps the values just got left out for some erroneous reason at some point in the process and the correction not timely made.
